

Question 1

Register an application with the Github API here <https://github.com/settings/applications>. Access the API to get information on your instructors repositories (hint: this is the url you want "https://api.github.com/users/jtleek/repos"). Use this data to find the time that the datasharing repo was created. What time was it created? This tutorial may be useful (<https://github.com/hadley/htr/blob/master/demo/oauth2-github.r>). You may also need to run the code in the base R package and not R studio.
